# azzurri making networks work

Azzurri is transforming the way companies buy and use information and communication technology. As pioneers of Virtual IP networks (IPVPNs) in the 1990s, Azzurri's managed data solutions have continued to develop over time delivering increased flexibility and agility to our growing customer base. Our knowledge and understanding of virtualised applications and technologies is unsurpassed. Azzurri has been a leader in developing methodologies and delivery frameworks that simplify data infrastructure and application networks for over 15 years.

Today Azzurri manages over 7000 data circuits globally for clients such as STA Travel, Rubicor Group, Reed Employment Services, Law in Order and BBC Worldwide. Azzurri is part of the global Azzurri Communications (UK) network.

MAKING NETWORKS WORK

azzurri design, deliver & manage

At Azzurri we design, deliver and mange your network, and we do so on the principles of **simplicity**, **performance** and **security**.

simplicity – our key to an efficient, cost effective network.

We have developed leading edge tools, methodologies and frameworks, to deliver optimised networks for the benefit of all our clients, large and small. We have no ties with carriers or telcos and are independent. Utilising our extensive knowledge and experience, we will be able to meet and deliver our best fit solution for your business.

performance – our holistic view of network design balances current needs with future expectations.

We have relationships with all the major national and global carriers and can deliver any type of network, anywhere and for any application. Azzurri can integrate new technologies with ease and meet all requirements, no matter how complex. We will novate and take responsibility of existing contracts and services to move you seamlessly onto Azzurri's sevice platform.

At Azzurri we know how important it is for your data network to integrate smoothly with every part of your business.

security – protection of your networks is an absolute must.

Protecting your network and business applications in an interconnected world is an absolute must when using cloud based and virtualised applications. Azzurri specialises in managing secure remote access to corporate applications without compromising network security, thereby meeting the needs of an increasingly mobile workforce.

Whether an internal network, or a remote VPN tunnel, Azzurri employs best of breed firewall applications and security solutions, so corporate data can be accessed effortlessly and securely.

Whatever your requirements Azzurri will ensure that you can adapt easily to the demands and pressures of an ever-growing, competitive, and increasingly globalised workplace.

Your company's greatest asset should be performing to its best potential. Using leading edge Performance Monitoring Technology, Azzurri proactively monitors and maintains your network 24 x 7 x 365 so that you can focus on your core business and leave the network in the hands of experts.

Contact us today to discuss how we can maximise your business performance.

"OUR SOFTWARE AS A SERVICE APPLICATION ALWAYS HAS A FAST AND RELIABLE CONNECTION THANKS TO AZZURRI'S MANAGED DATA SERVICES AND PROACTIVE MONITORING – THAT'S VITAL TO OUR BUSINESS AND CLIENT SATISFACTION."

Les Parry, Managing Director, Pegasus Systems
